- Steel Cruiser: a traditional sailboat with a long keel.
- Apparently built around 1950 for a wealthy Dutch pharmacist.
- Very thoughtful interior design and very solid steel-banded construction.

"It has been kept for the past few years in a shed to be restored??? then went in the year 2020 from the town of Damp in the eastern sea of Germany over the rough seas of the North Sea and up to the south coast from England and back to France.

She???s a solid cruiser, she sails effortlessly even in rough seas."

- Liferaft (good but needs a new overhaul)
