Owner's Comments

Builder: Yachts Cruisers

- Cruiser 500 Express

- year 2004

- Outstanding length: 15.90 m

- Flotation length: 14.69 m

- Width: 4.70 m

- Minimum drawing: 1.10 m

- height under barrot of: + 2.00 m

- Weight: 18,500 kg approximately

The Cruiser 500 Express of Cruisers Yachts is an ideal choice for navigation enthusiasts thanks to its many distinctive advantages and characteristics:

The spacious interior with high quality materials, offering exceptional comfort for passengers.

The bright living room of the Cruiser 500 Express, the fully equipped kitchen, and the comfortable cabins, are perfect for prolonged cruises.

Equipped with powerful engines, the Cruiser 500 Express offers fast and stable navigation, ideal for cruises on the high seas.

Excellent handling thanks to an optimized hull design, making navigation pleasant and secure, aboard the Cruiser 500 Express.

Navigation and communication systems at the cutting edge, guarantee precise and secure navigation.

Air conditioning, high-end audio-video systems, and outdoor relaxation areas are well appointed.

The Cruiser 500 Express is adapted to various nautical activities, such as cruises, water sports, and outings with family or friends.

It is designed for easy maintenance, which reduces costs and efforts for the owner.

Cruisers Yachts is renowned for the quality of its constructions and its attention to details, ensuring sustainability and performance.

The after-sales service network is well established, providing reliable support to the owners.

The Cruiser 500 Express is a wise choice for those looking for a high -performance, comfortable, and well -equipped boat, with the guarantee of quality and reliability of yachts cruisers.

Motors:

- Volvo D12 -675

- 2 x 675 hp

- Transmission: direct water cooling shaft line

- Fuel capacity of about 1900 liters on 2 tanks

- 785 hours of use

- speed of 23 to 33 knots approximately

- Consumption of about 100 l/h on the 2 engines

The marine engine D12-675, equipped with the latest Diesel technological advances, is specially designed for planing fast boats. This technology optimizes engine performance and efficiency, ensures effective combustion and reduces fuel consumption and polluting emissions. In the end, the D12, with its total electronic control, offers a unique combination of high performance, excellent reliability, low consumption for long trips and a low emission rate.

The comfort on board is first-class thanks to the different levels of soft and precise control, to the automatic synchronization of the bi-motor and the vibration shock absorber on the camshaft.
