## Owner's Comments

UNIQUE model on the market. Specially equipped from the outset by the shipyard with a lifting and telescopic system for secure and easy access to the cockpit for a person with reduced mobility from any quay height and/or to the flybridge. This system is also designed to be submerged for swimming. An internal platform is also operational for access to the forward cabin from the saloon. Black and grey water tanks are present on board but not connected. Integrated into the cockpit floor is a hydraulically adjustable table. The gangway is also hydraulically powered. The electrical circuit is 24 V, it includes two chargers. There is a safe. ONE owner since the first launch in 2003. Motor batteries, services, thruster, and generator replaced in 2022. Price reduction in February 2025.
