Owner's Comments

I am selling my unique Sealord 446 model on the market. Specially equipped from the start by the shipyard with an elevator and telescopic system for safe and easy access to the cockpit for a person with reduced mobility from any quay height and/or to the flybridge. This system is also designed to be submerged for swimming. An operational platform is also available inside for access to the forward cabin from the saloon. Black and gray water tanks are present on board but not connected. Integrated into the cockpit floor is a hydraulically operated adjustable table. The gangway is also motorized. The electrical circuit is 24 V, it includes two chargers. There is a safe. ONLY one owner since the first launch in 2003. Motor batteries, services, thruster, and generator park from 2022. Recent price reduction.
